| About Sportify

Who we are

Alright Let's talk business, shall we?

We get your enthusiasm towards entering the sports market, it's exciting everyone wants to hop in. But would you let an amateur play in your team in the world cup finals? exactly, get in but get in as a professional, chest high backed up by data-based consultations, white labeling, armed with talent scouting technology products, web and app development, and on-ground execution. You're stepping into a 360-sports activation firm.

SPORTIFY
بوزنیفاي

The background is a dark, high-contrast photograph of various sports items scattered on a grassy field. In the upper half, a tennis racket with a white string pattern is visible, with a tennis ball resting on its head. Below the racket, a baseball glove is shown, holding a baseball. A wooden baseball bat lies horizontally in the lower right. A portion of a soccer ball is visible on the left side. The overall lighting is dim, creating a moody atmosphere. A thin, curved blue line is visible in the top right corner, and a green curved shape is in the bottom left corner.

Scouting Program

Leveraging our technology, specialized tools, and on-ground expertise, we offer you a comprehensive, step-by-step scouting program. This program includes everything from listing your program with detailed information, effectively marketing it, to expertly organizing events, all aimed at maximizing your opportunities to select the ideal talent for your team

Advanced Match Stats, Analytics Gadgets

Governance

With complete professionalism we assist our clients to ensure that the organization operates with integrity, transparency, and strong corporate governance practices. Gain a competitive edge, build stakeholder trust, and drive long-term success with our expert guidance and comprehensive governance solutions.

Sports App Development

White Label

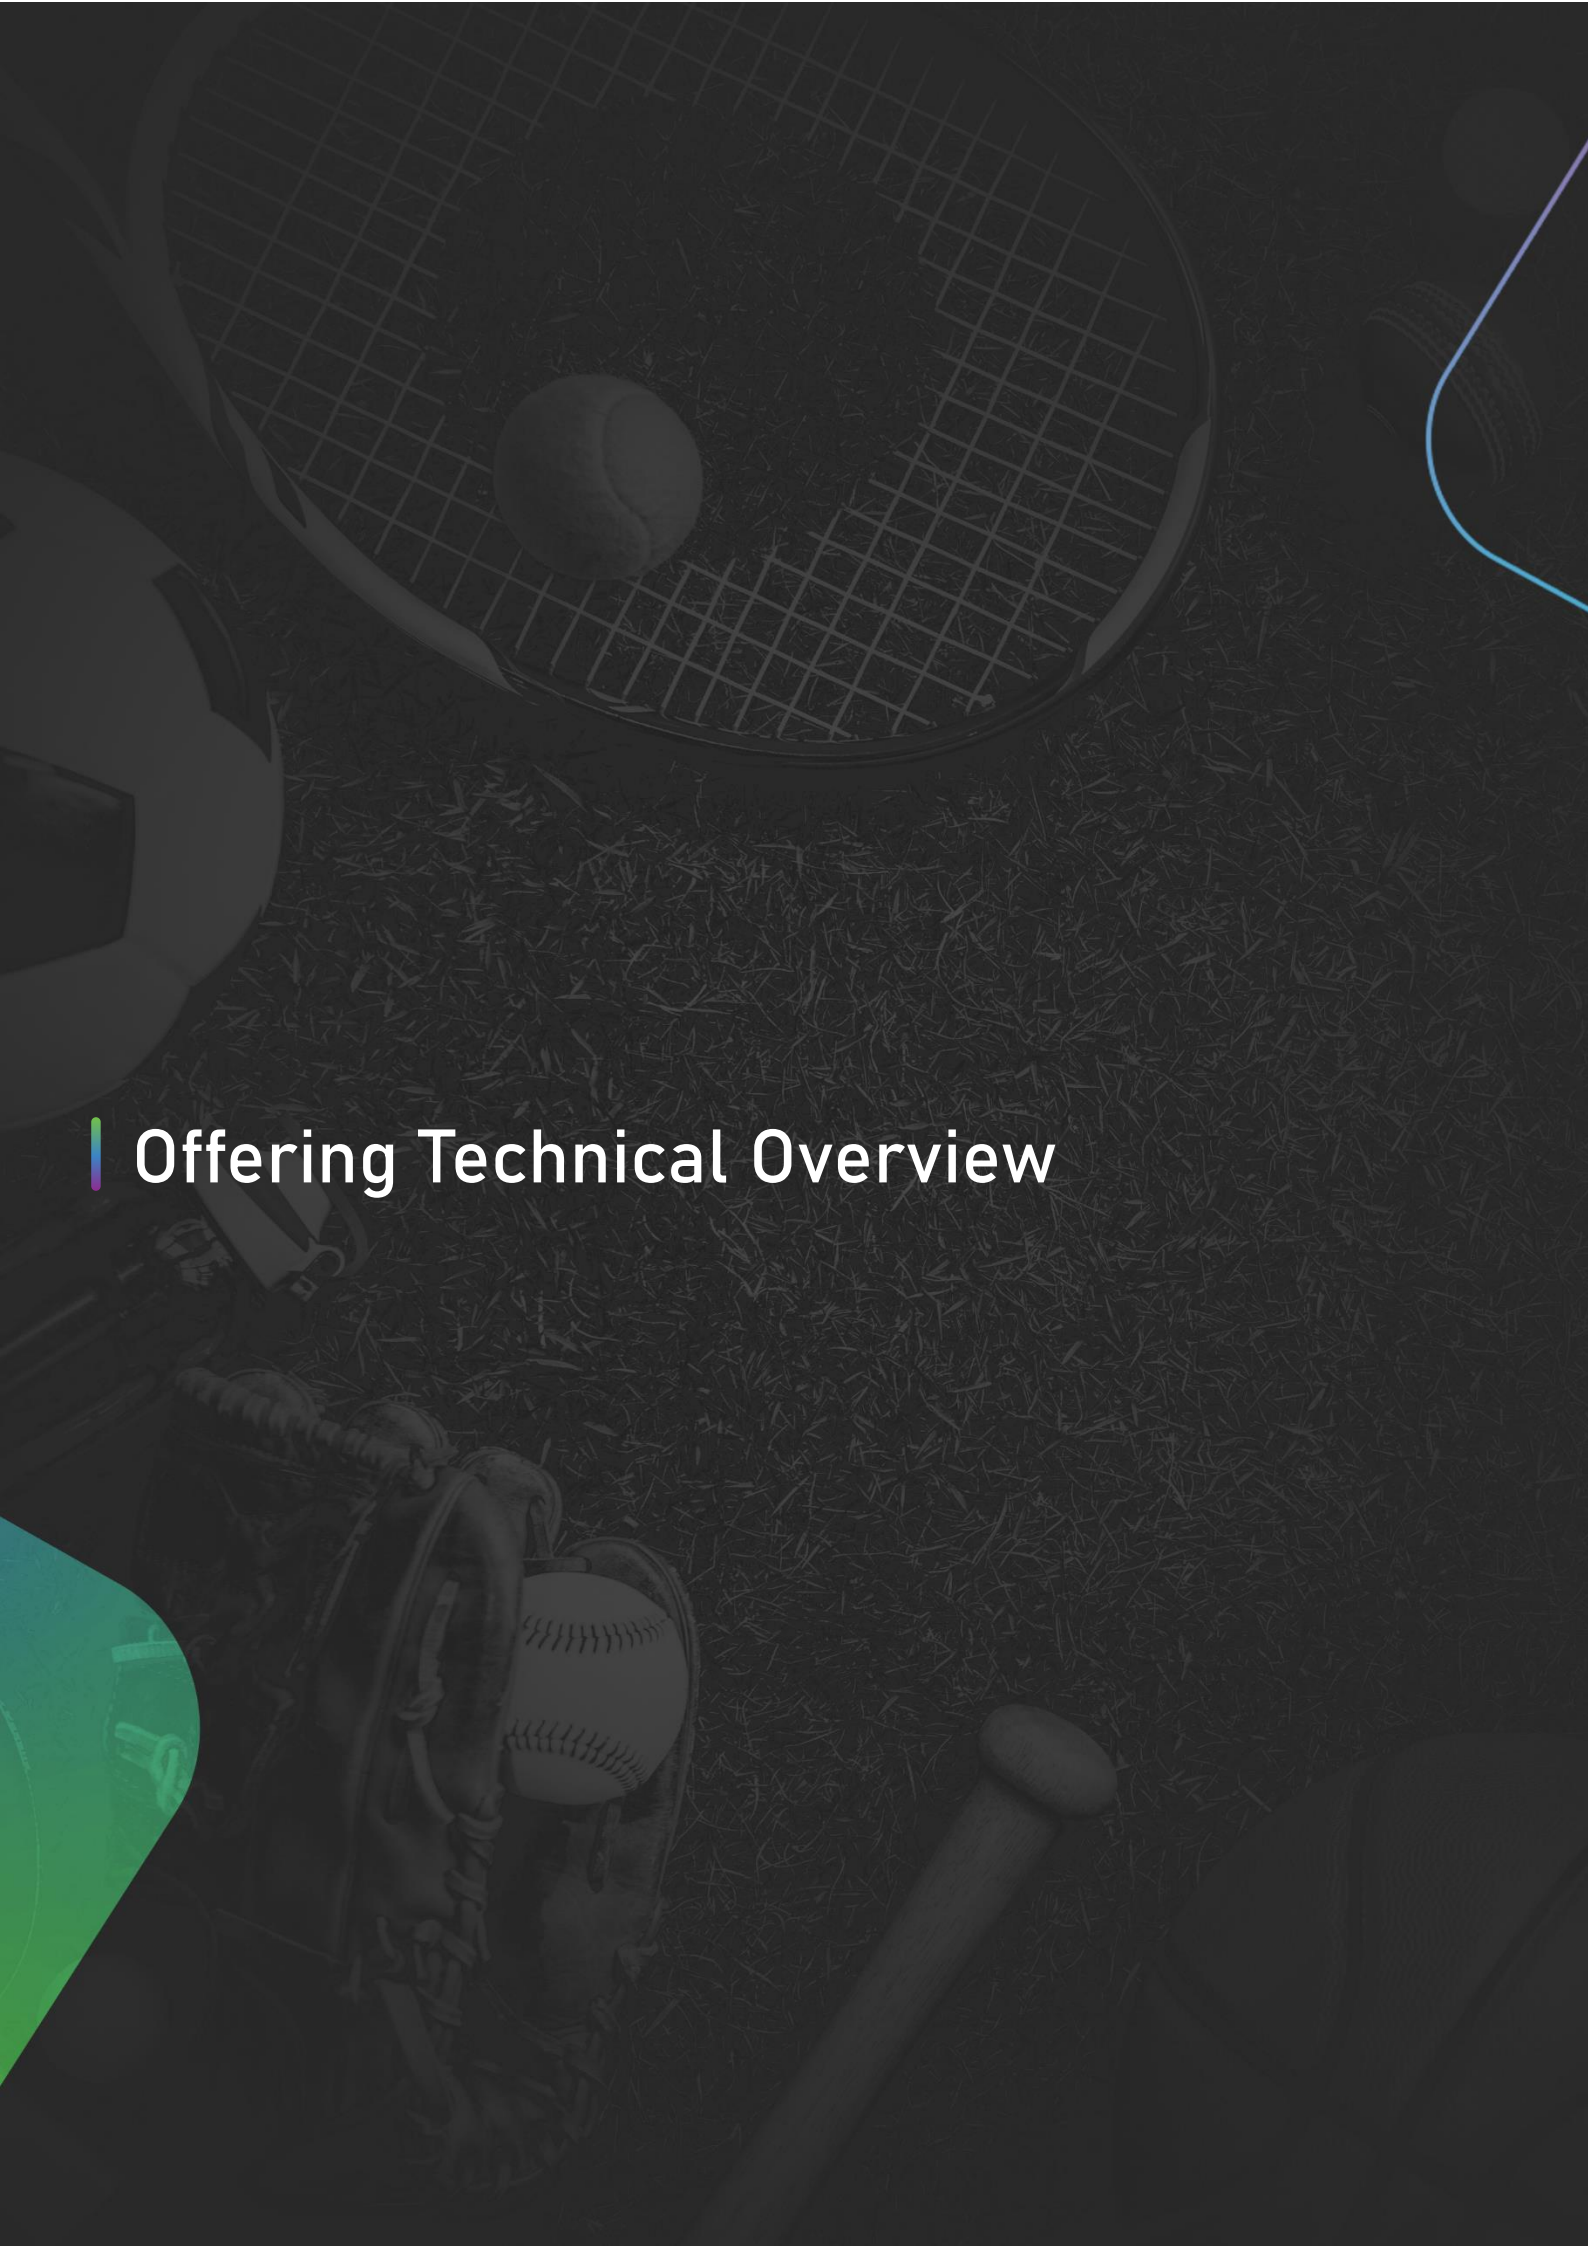

Create an exciting and engaging sports website or application with our technology and platform. Choose from our fully managed white-label solutions, whether you want a stand-alone website or to integrate it seamlessly into your existing portal. Our designs are of top quality and fully responsive, ensuring an optimal viewing experience on any device. Additionally, our microsites provide a swift and efficient way to deliver high-impact content for major tournaments like the SELA Schools Tournament, Mahd Championships, SPSF, and other prestigious events

Custom Platform

We understand that every business has unique needs and challenges. Our custom platforms namely admin panel, websites, or mobile applications are built from the ground up, taking into consideration your specific requirements, workflows, and business processes. We collaborate closely with you to gather insights, understand your goals, and develop a platform that aligns perfectly with your vision

Integration

Integrating your systems and applications eliminates manual data entry, reduces errors, streamlines your business processes. Our integration solutions enable real-time data synchronization, allowing you to access accurate and up-to-date information across your organization. By automating workflows and eliminating redundant tasks, you can optimize efficiency and focus on strategic initiatives

To the left, a portion of a soccer ball is visible. In the lower center, a baseball glove is open, holding a baseball. To the right of the glove, a wooden baseball bat lies horizontally. The background is a textured expanse of grass. The overall lighting is low, creating a sense of quiet and stillness. A thin, curved blue line is visible in the upper right corner, and a green curved shape is in the lower left corner.

Offering Technical Overview

Introduction

Transforming your ideas to reality!

We are living in the age of connectivity, and that means more things than ever before are right at your fingertips. With one press of the button, one swipe left or right, you can open up new worlds in seconds. We are talking about apps, those little icons on your mobile and desktop devices. But at Sportify we don't just talk about apps, we live and breathe apps. We have assembled a team of the best and brightest minds in software development, marketing, and leadership, giving our clients access to the most cutting-edge technology. You can rest assured you are in good hands, as we have years of experience in Web, Android, and iOS app development. Our goal is to create something you are proud of and that helps your business. Apps can be transcendent, and they can also be colossal failures. That's why Sportify has developed a comprehensive approach to app development that takes the guessing out of the game. We are ecstatic that you are considering doing business with us, so let's get started.

- What to Expect

App development is serious business. It takes time and patience to create something that works for you and is free of bugs and other issues. Updates are required, but it's important to start with a sound foundation. At Sportify, we believe in a thorough approach that provides our clients with as much engagement as they request. While our entire team will be developing your app, we will assign a project Manager who will be your main point of contact.

- Research and Outreach

A large part of the work Sportify does is behind the scenes. There will be times when we communicate with the client for hours/days/weeks to get things transparent, that's only because we're intimately involved in the research and strategy making phase. However, before any of that begins, we need to make a checklist of everything you want in your new app. We will gather information about your company/business and how it works. We will figure out who your users are and how we can attract more through your new app.

Audience engagement, research, and branding are key in app development, and we will conduct focus groups to find out why people choose your app

1. Process We Follow

Every app is different, but our tried and tested app development process is designed to ensure that your app is a success. That means it's delivered on time, it's bug-free, and it does everything it's supposed to do. We believe in an agile approach based around iterative design and development; feedback, testing and flexibility are key.

- **Concept Sketching:** During this phase we will focus on whether your app is lean and simplistic or an advanced app with all the bells and whistles, we will bring your ideas from concept to completion. Let us make your vision a reality.
- **Research & Strategies:** This phase is where your concept will start taking shape. By applying the proper resources, we will provide a customized approach to every facet of the app building process. We keep you involved in every step of design and development to ensure that you are constantly meeting or exceeding your goals.
- **Wire-Framing:** At this stage, we focus on fine-tuning and modifying the user experience. Meeting and exceeding user needs is essential. Wire-framing is one of the highest importance and it is the foundation for providing a successful application development we believe.
- **User Interface Design:** After completing the wire-framing, we will have a good idea of how user engagement and screen flow will take place on your specific application. Next, the experts within UI design team will convert the wireframes into clean and attractive interfaces.
- **Development:** Once the user wireframing has been completed, the mobile and web development team will start coding your application. Server components will be taken into account during the process to streamline development time and to avoid any complications. We encourage you to work side by side with our development team during this phase. You will also be provided with builds during all stages of the process so you can be thoroughly involved in all aspects of the development stage.
- **Testing:** During the development stage, we take a methodical and organized approach to guarantee superior quality and efficiency in the operation of your application.

2. project overview

- Technical Solution

Phase	Tools/Technology
Designing	- Sketch - inVision
iOS Frontend Development	- Swift - IDE - XCode
Android Frontend Development	- Core Java - IDE - Studio
Web Frontend Development	AngularJS
Backend Development	- MEAN - MongoDB, ExpressJS, AngularJS, NodeJS - Or - LAMP - Linux, Apache, MySQL and PHP
Testing	- Asana (issue tracking) - Bugzilla (issue logging)
Web Frontend Development	Web Panel
Backend Development	- DB Architecture - Backend APIs - Admin Panel
Testing	- Bug Report - Test Cases

- Client Deliverables

Phase	Deliverables
Research and Feasibility Analysis	Requirements Document
Designing	- Wireframes - Design Screens - Prototypes
App Frontend Development	- iOS Apps - Android Apps

- Project Team

Team	Role
Project Manager	SPOC, manage the entire project from scoping to delivery
Solution Architect	Design the platform layout and flow
Designer	Wireframing and branding
App Developer	Dedicatedly working on front end app developer
Web Developer	Dedicatedly working on front web developer
Backend Developer	Building the entire backend and integrating with each of the touchpoint component
QA (testing)	Testing and Bug fixing

3. Security Protocols

The app must implement some of the core security features that will provide secure aspects:

- Back End: Will Hold personal info. So, it requires using the secured Socket Layer, enabled by SSL certificates. They provide a secure, encrypted connection between your visitor and your site.

The diagram illustrates the pricing and details for GoDaddy's Standard SSL wildcard certificate. It shows three pricing tiers based on the number of transactions per day: 100, 1000, and 10000. Each tier is priced at \$22.00/month. A separate section explains that the certificate provides a secure HTTPS channel for all communication between the app and the server, with an on-cost of \$269.00/Year. The URL <https://www.godaddy.com/ssl/ssl-certificates.aspx> is provided at the bottom.

Number of transaction/day	Price
100	\$ 22.00/month
1000	\$ 22.00/month
10000	\$ 22.00/month

Standard SSL wildcard certificate

provide To make all communication between app and server over HTTPS secure channel

On Cost \$ 269.00/Year

<https://www.godaddy.com/ssl/ssl-certificates.aspx>

- Tokenization may be used to minimize exposure of sensitive data such as Bank accounts, Driver's License, Digital Signatures and financial statements.
- Post API methodology, it provides the medium restrictions and wrapped the data more secretly so that no outer world entity can access the data.
- Real Time Tracking Sockets can be used to decrease the load on the application, App does not have to call API each time. Once it is called the connection has been made.
- Use PCI and Vulnerability Scanning Services: we'll need to proactively identify and address security issue before they damage our website.
- User-granted permissions to restrict access to system features and user data.
- Using a managed DNS service can improve your network and website performance and provide additional security. An application framework with robust implementations of common security functionality such as cryptography, permissions, and secure IPC.
- Third-party apps are signed by the developer using an Java-issued certificate. This ensures that apps haven't been tampered with or altered. Additionally, runtime checks are made to ensure that an app hasn't become untrusted since it was last used
- An encrypted filesystem that can be enabled to protect data on lost or stolen devices. Database backup solution providing daily-based backups.

Privacy Requirements:

There are safety/ privacy concerns regarding user's safety and privacy. To protect user's online privacy, we'll limit what we collect during the signup process, and what we'll make public on the website. We won't sell or rent account information to anyone. Also, there will be Terms of use of the product, that the user should accept during signup process.

Software Quality Attributes

The primary attribute of this application will be usability given the large amounts of data and information that will be presented on different screen layouts, as well as the user's ability to input data into the browser/ device in a reasonable manner that should not be that much more difficult than if they were at an actual computer. As usability is hard to quantify, substantial user testing will be needed, and feedback gathered to determine if the application can generally be considered usable.

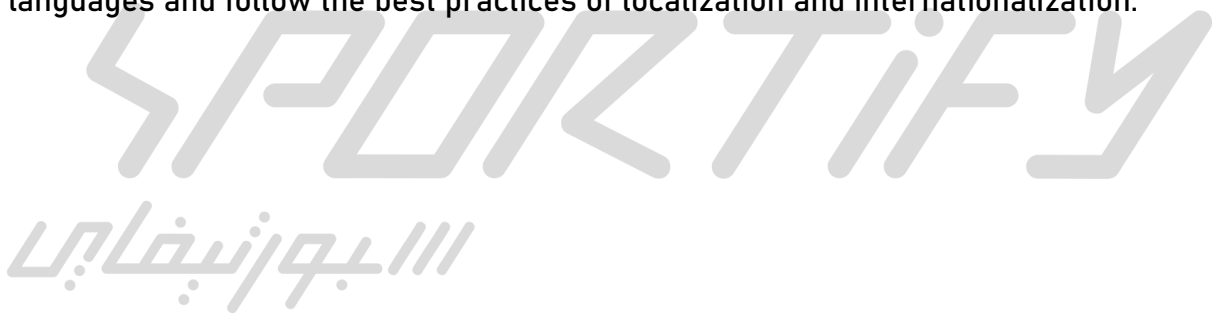

Because this project will run on different platforms/ mobile devices, portability is also important. We don't want it to take up so much space or be too slow causing the user to not be able to fit it on the app. The success criteria for the project will be analyzed separately for all the modules. Success criteria for a simple programming environment, is easy to use and user friendly. All use the features of the behavior of the platform prepared by asking a series of activities to do with this behavior from user will be analyzed in the context of platform-user interaction. The website version will be responsive, thus providing adjustment for different devices and layout.

Database Requirements

The information used in the MEAN back end-based platform can be stored in an existing server AWS, with MongoDB being the database system. On the server side (backend) – there will be MongoDB, ExpressJS, AngularJS, and NodeJS. The data used must be consistent with the server application so they can be used together. While user's data on the application end will be stored in shared preferences.

4. Languages

The app will support two languages: Arabic and English. The default language will be English, but users will have the option to switch to Arabic at any time. The application will also ensure that the content and layout are compatible with both languages and follow the best practices of localization and internationalization.

Development & Deliverables

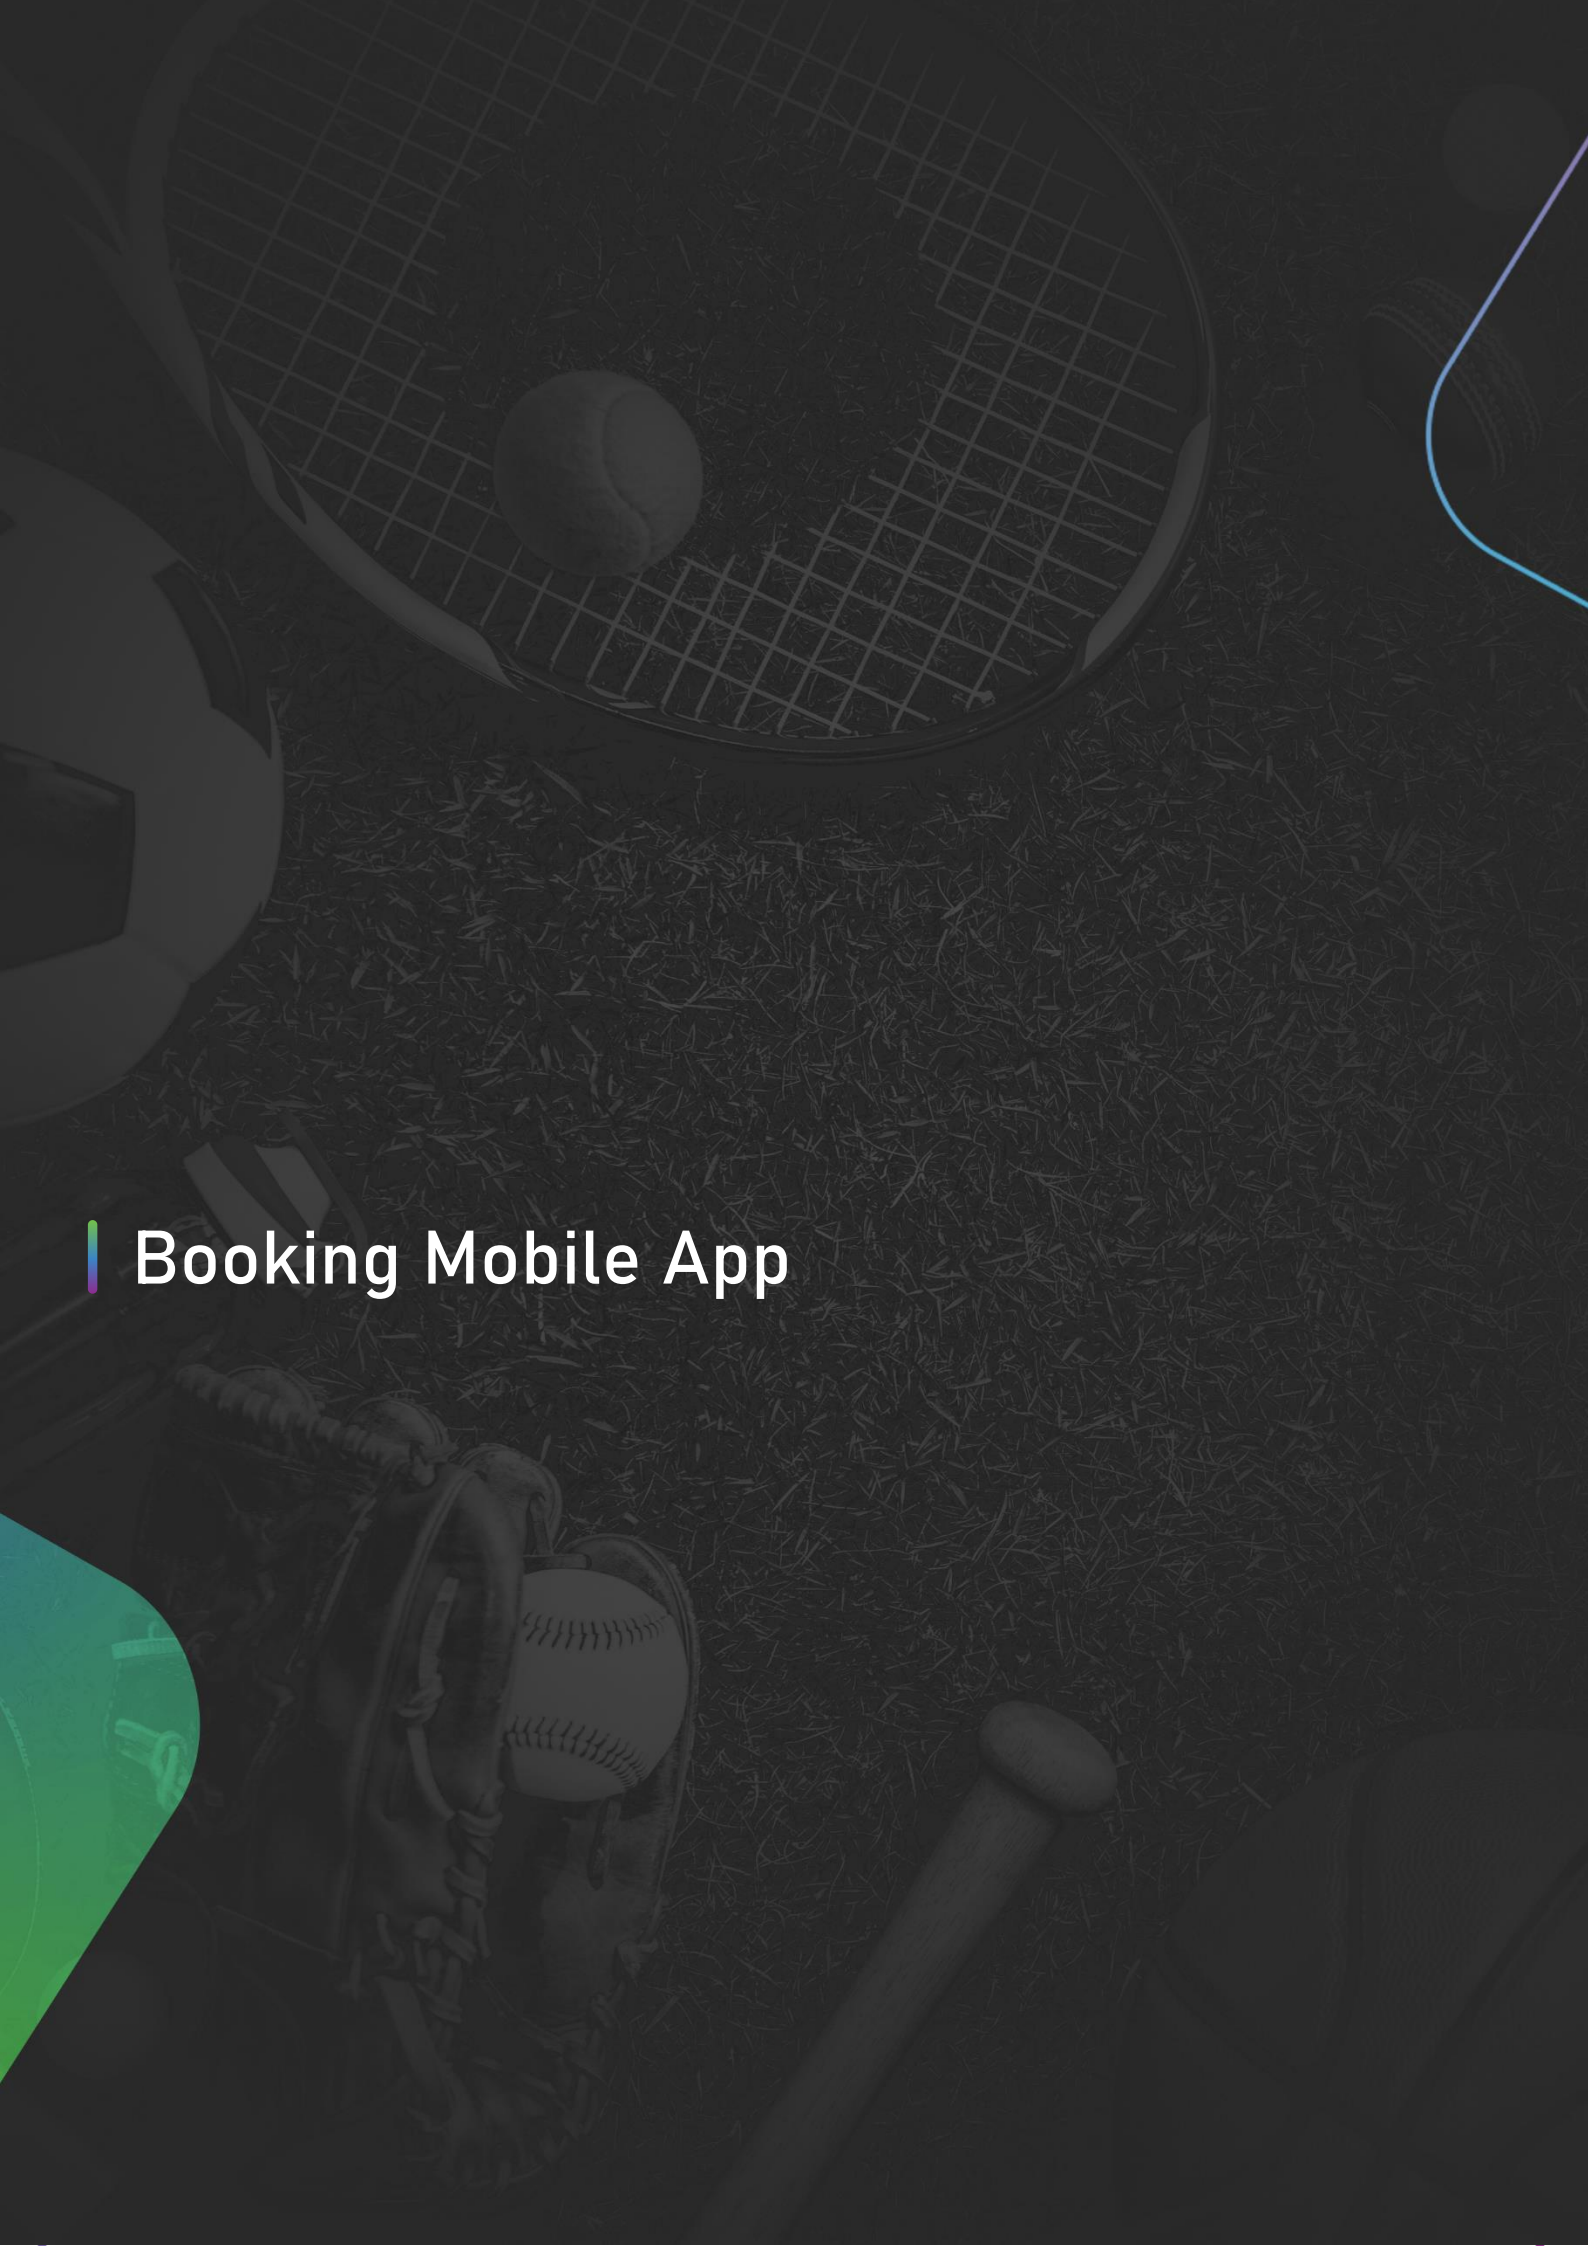

The deliverables will be three Applications including:

- 1- Player Booking App as mobile applications serving Academies Clubs and Players
- 2- Booking Management App for field owners, it will be deliverable as web and mobile applications.
- 3- Academy & Club Contract Management Admin panel for Field owner

1	Mobile app	Player Booking app	- Academy - Clubs - Players	- IOS - Android
2	Mobile app	Booking Management app	Field owner	Android
3	Web app	Booking Management app	Field owner	Web
4	Admin panel web app	Academy & club Contract management	Field owner	Web

Development Languages

- English
- Arabic

A dark, moody photograph of various sports equipment scattered on a grassy field. In the upper half, a tennis racket with a white string bed and a tennis ball are visible. In the lower half, a baseball glove holds a baseball, and a wooden baseball bat lies nearby. The background is a textured grass field. The text 'Booking Mobile App' is overlaid in white, with a small vertical bar of rainbow colors to its left.

Booking Mobile App

Scope Of Work

Target Audience

- Academy
- Clubs
- Players

App feature

1. Splash Screen
2. Registration & signup
3. Login
4. Home page
5. Fields details
6. Booking service
7. Payment process
8. My booking history
9. Setting
10. My profile

1. Splash Screen

A splash screen is an introductory screen that users see when they launch the booking app. This screen can either be an image, graphic, logo, or animation.

2. Registration & signup

Enables Players, Clubs, and academies to independently register and gain access to the booking app. It will have multiple signup pages depending on the types of users want to register. User authentication and verify credentials, allows the app to verify the user's identity and ensure that only authorized users can access the app.

- Fill out the information required to create an account.

Account verification features:

- One time password: OTP phone verification
- One time password: OTP email verification

Academy & club registration features:

- The Academy account won't be automatically activated.
- To activate the account:

Booking and contract administrator activates the academy and club account by using the Admin Panel system for contract management:

- Review club and academy details.
- Upload contract between the club and malabi
- Upload contract between the Academy and malabi
- Activate the account or reject.

3. Login

Login allows only authorized users to access the booking app's features and use the booking service. User can access to the related account by using users access and password together

Login methods:

- Phone number
- Username
- Email address

4. Home page

The home page displays all the features and services of the booking application, serving as a starting point for moving from one service to another.

It appears immediately after logging in. It allows the user to move from one service to another.

Home page features:

- Field booking service
 - Near fields (KM)
 - Far fields (KM)
- Notifications

- My booking
 - History
- Side menu to move from one page to another.
 - Settings
 - My profile
 - Change language
 - Logout

Services Feature:

- Search
- Filter
- Sorting
- Location

5. Fields details

The Fields page displays all the available and activated fields by the field's owner (Malabi) It allows the user to view field information and to book a field.

Fields details features:

- Fields image
- Field name
- The distance
- The size
- Fields amenities
- Field location
- Field price
- Payment process
 - Down payment
 - Full payment

6. Booking Service

The booking service allows the user to view booking schedule and book available slots.

Field Booking Features:

Allow user to book:

- For one time booking
- Or recurring booking

Allow user to choose slots:

- Select available day and date
- Choose available time
- Complete the booking or cancel the booking

Sub feature:

- Cancel booking

Booking rules and restriction:

Do not allow the user to book more than one field at the same time and date within the same duration.

7. Payment process

The payment process enables users to complete payment to book a field by using one of the available payment methods supported and provided by booking app.

Users won't be able to complete the booking without completing the payment.

Provide a receipt for every user after completing the payment.

Payment features

- Payment methods
 - Credit card
 - Visa
 - Master
 - Mada
 - Apple pay
 - STC pay ... etc.
- Payment Type
 - Full payment
 - Down payment

Note: the payment method might change based on client requirements and integration

Receipt

System will generate receipt for the users after completing the payment includes:

- Field details
- Booking time and date
- Total amount
- VAT %
- Price after vat
- Vat # number
- Receipt ID # number

Return payment features:

System will allow users to cancel future booking

- System will return back the paid amount to the related users
- Notify player via email with the returned amount

8. My Booking History

My booking page contains two main pages booking history and my payment history.

The booking page includes all the booking related to the user.

Booking history features:

Allow user to view all booking:

- Post / previous booking
- Ongoing booking
- Upcoming booking
 - Allow user to cancel upcoming booking
 - Allow user to edit time, day and day for upcoming booking

My Payment History

- Allow user to view all payment
 - Booking details and information
 - Paid deductions receipt
- View generated receipt
- Download generated receipt
- View returned amount

9. Settings

The settings allow the user to change and control some of the services and features that are available in the booking application.

Settings Features:

- Edit profile
- Change password
- Delete account
- Report technical issues
- App privacy and policy

10. My Profile

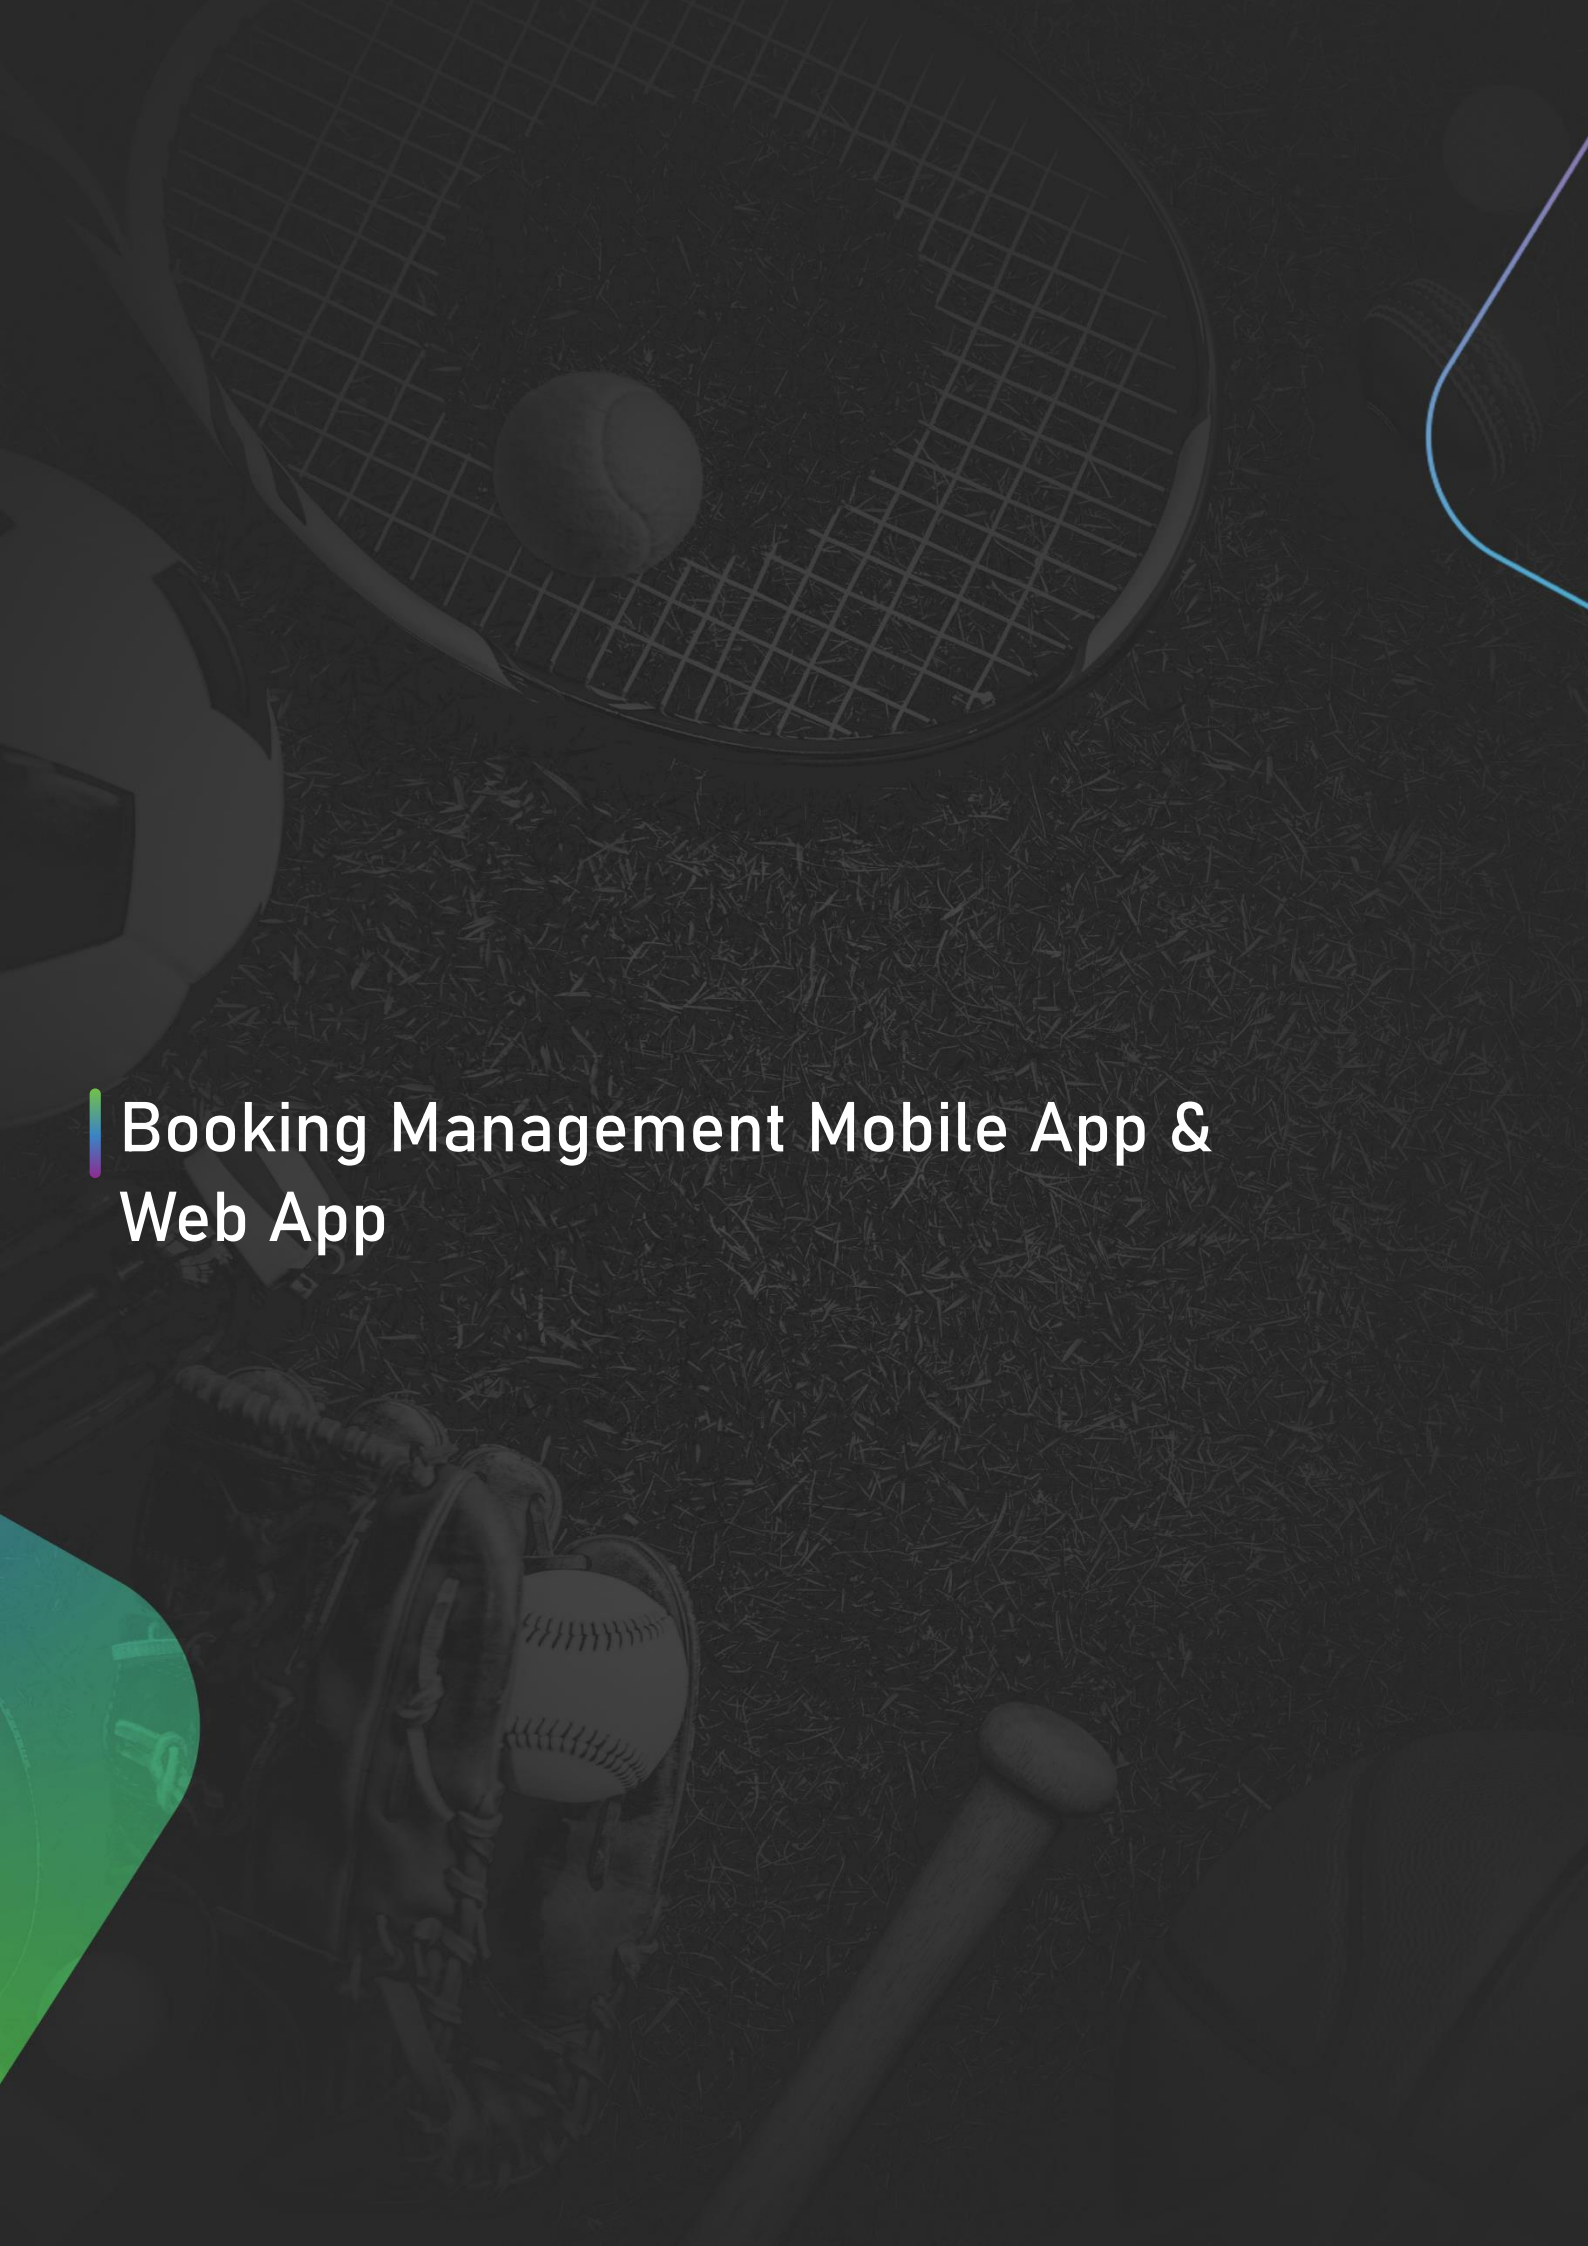

A user profile is a collection of general information, contact information and experience information associated and linked with a specific user. Contains information to identify the user.

My profile features:

- Player details
 - General information
 - Personal photo
 - Player name
 - Player age (DOB)
 - Nationality
 - City
 - Contact information.
 - phone number
 - Email address
 - Football experience and knowledge
 - Add who played for with team, club, ... etc. add football profession.

- Club details
 - General information
 - Club logo
 - Club images
 - Establishment date
 - Club responsible / account manager
 - City
 - Contact information

 - Year

9. Notification

The notification feature is a service that provides the user with reminders, new booking alert, or other information.

10. Settings

The settings allow the user to change and control some of the services and features that is available in the booking application.

Settings feature:

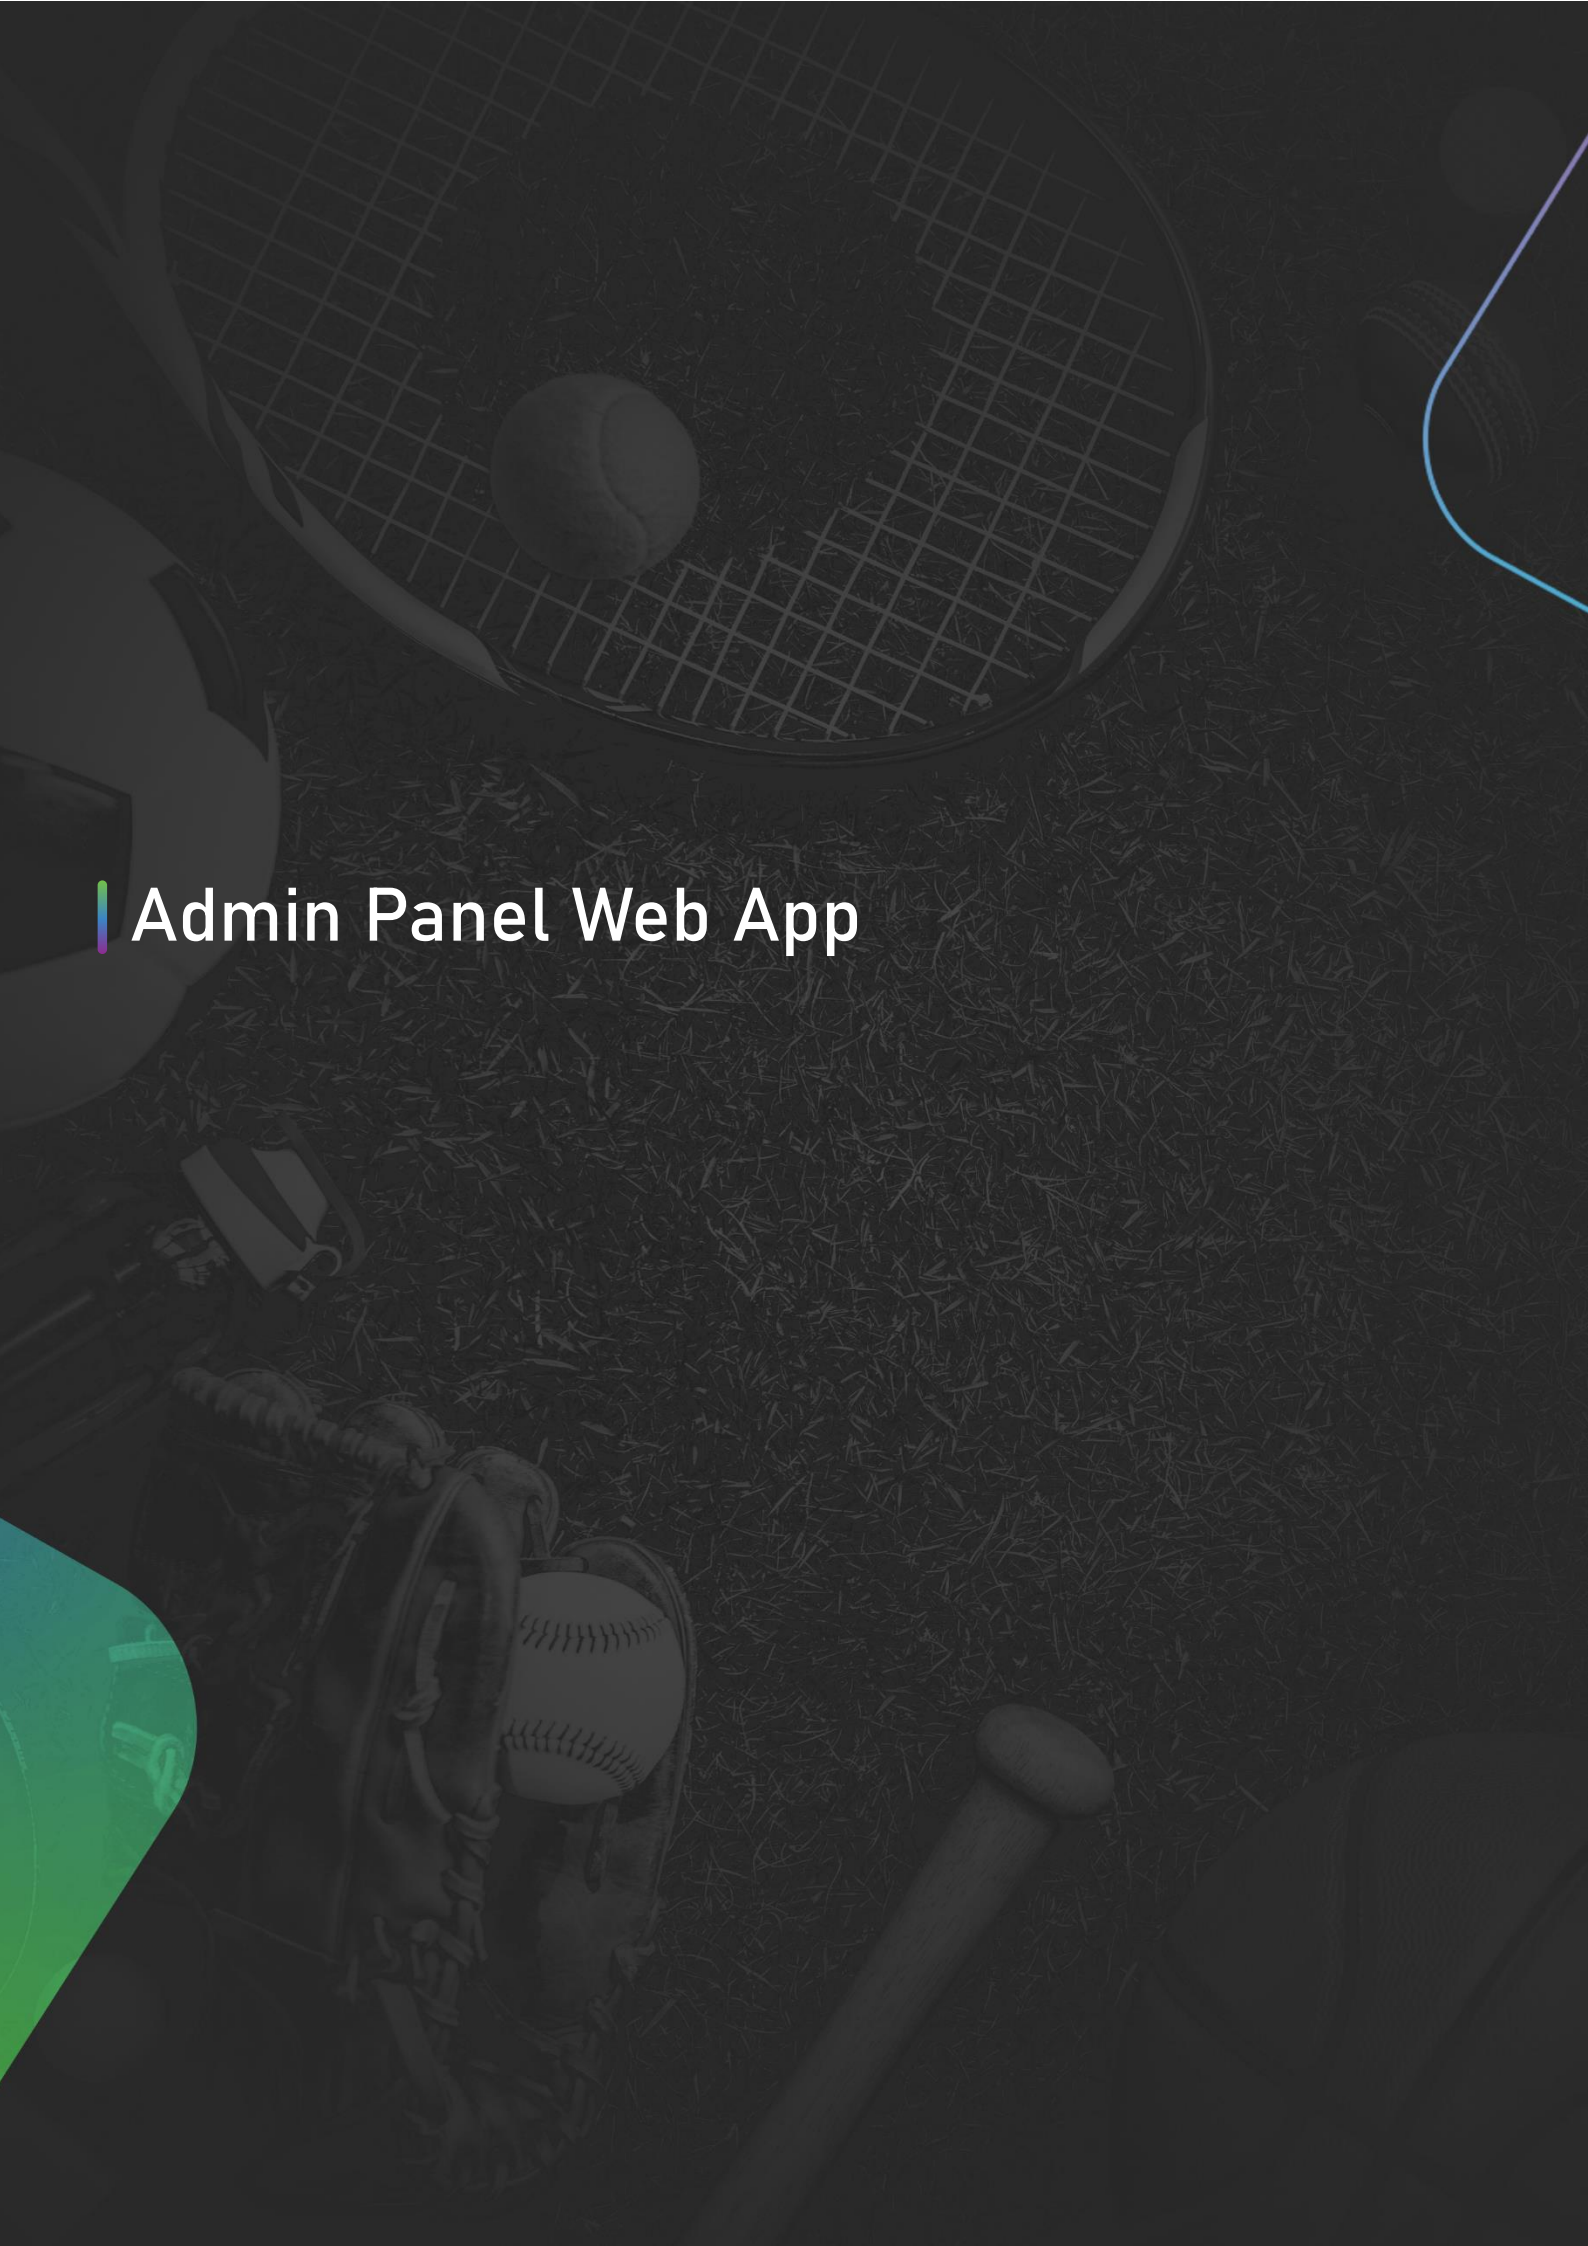

- Edit profile
- Change password
- Change language
- Delete account
- Report technical issues
- App privacy and policy

11. Profile

Profile page contains booking responsible login details and information to identify the user (booking responsible)

Profile features:

- Phone number
- Email address
- City
- Booking admin responsible name
- Photo

A dark, moody background image featuring various sports equipment scattered on a grassy field. In the upper half, a tennis racket with a white string bed and a tennis ball are visible. In the lower half, a baseball glove holds a baseball, and a wooden baseball bat lies nearby. The overall tone is dark, with some light reflecting off the equipment. A thin, curved blue line is visible in the upper right corner, and a green curved shape is in the lower left corner.

| Admin Panel Web App

Scope Of Work

Target Audience

- Contracts management super admin
- Contracts management sub admin

App Features

1. Login
2. Contract management
3. Permissions

1. Login

Login allows contract admin to access the contract management and use application features user can access to the related account by using user access and password together.

Login method:

- Email

1. Contract management

The contract management page allows contract admin to activate academy and club accounts to be able to access booking app.

Contract management features:

- Clubs list
 - View all registration & submitted registration details
- Academies list
 - View all registration & submitted registration details
- Activate account
 - Add valid contract
 - Upload contract
 - Contract start date
 - Contract end date
 - Activate account or not

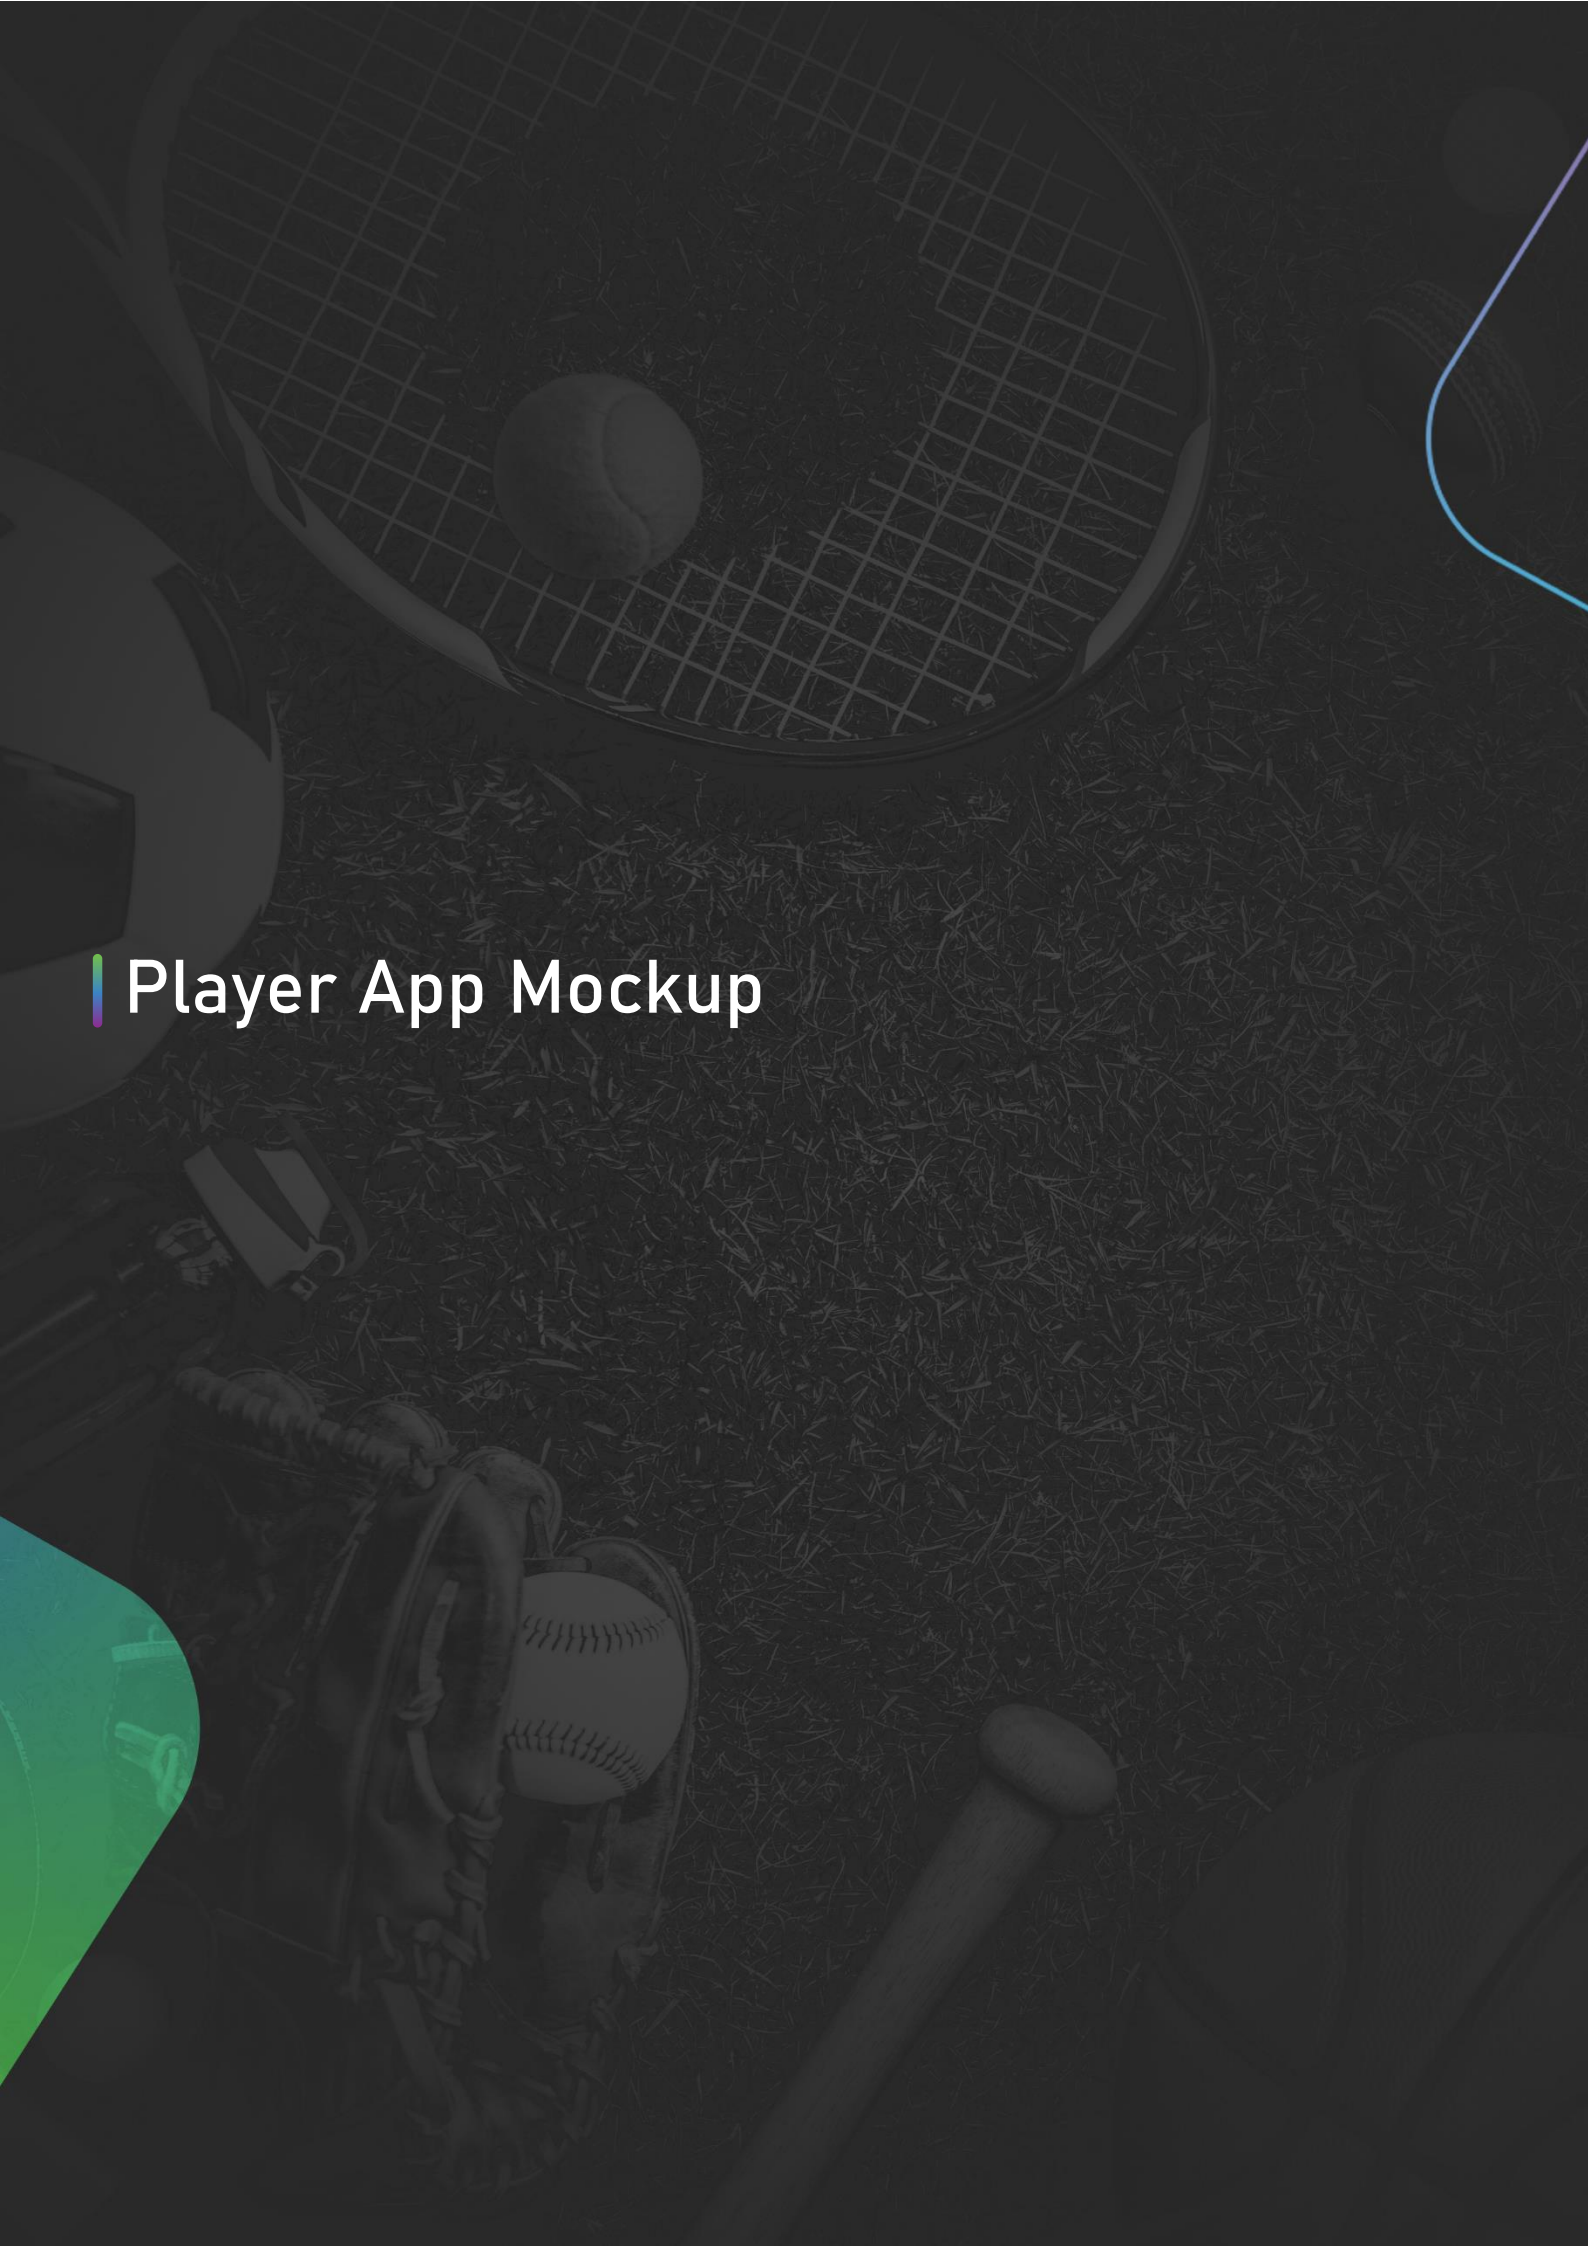

2. Permissions

Permission pages allow the super admin to add more than one sub admin responsible to activate academy and clubs account to be able to access booking app.

Permission features:

- Add sub admin email
- Add password
- Choose responsibilities
 - Activate club account – contract management
 - Activate academy account – contract management
